Customer Journey

Do you know how to measure and improve your customer's experience? Do you know their pain points and know how to solve them?

Customers who have had a good experience with a brand increase their spending with it (+50%), recommend the brand more and better (+60%) and reduce their abandonment rate (-10%). The Customer Journey allows the analysis of the customer experience in relation to our brand through the different channels, allowing the identification of key points of improvement and differentiation.

At Bismart we have created a model based on Customer Journey that analyzes data from the purchase funnel by stages, customer satisfaction levels, pain points and other key metrics for customer management and improvement of their experience.
